Riedel’s thyroiditis

Narang S
Professor
Department of Pathology, Index Medical College Hospital and Research Centre, Indore, M P, India

MEDICAL POEM

Riedel’s thyroiditis is chronic and rare
Structures adjacent also, it does not spare.

Contracted is the gland and hard as stone
With compressive symptoms, patient does morn.

On females between 40-70 it picks
Carcinoma of thyroid it mimics.

Multifocal fibrosclerosis of reason unknown
To fibrosis, widespread the patient is prone.

Fibrocollagenous tissue is dominant
And thyroid parenchyma is not prominent.
